

Lacquered Flooring

Maintenance Guide

In order to ensure lasting satisfaction from your new lacquered floor, it is important to correctly care for the floor starting immediately after installation. With the right care, the lacquered floor will maintain a fresh, clean new looking surface with a subtle sheen.

All the products related to maintaining this flooring will be available to purchase at very competitive prices after you have selected your flooring and added to the basket.

General After-Care

Cleaning

Normal cleaning to remove surface debris is accomplished using a broom or vacuum cleaner. To remove normal stains and non-loose dirt, the floor should be cleaned with the Easy Clean Lacquered Flooring Cleaning Spray. This easy to use spray is ideal for hectic homes which need a quick cleaning solution - simply spray evenly across the floor, allow a minute to work on any stubborn marks and simply mop over. We recommend the use of the Easy Care Aluminium Micro Fibre Mop.

Cleaning Extremely Dirty

Floors

If the floor has been neglected and/or becomes very dirty, it is advised to use the Easy Clean Lacquered Flooring Intensive Cleaner. Simply dilute 1 cap to 2 litre of warm water and apply with the Easy Care Aluminium Micro Fibre Mop. After allowing the solution to work on the dirt simply go over the area again removing the solution and the dirt from the floor - for stubborn marks repeat this process.

Refreshing Your New Floor

To keep the floor looking new it is recommended to use the Easy Clean Lacquered Flooring Refresher, this prevents dust build up, adds antistatic and anti-slip properties as well as restoring the floor to its original sheen. Prior to application it is recommended all loose dirt is swept and removed from the surface followed by using the Easy Clean Lacquered Flooring Intensive Cleaner to ensure the refresher is applied directly to the flooring surface. Do not layer on top of any stubborn dirt to ensuring the best results. As a ready solution this is ideal to quickly refresh your flooring and to maintain that new look, this is recommended 2-3 times per year dependant on wear and foot traffic.

All the products related to maintaining this flooring will be available to purchase at very competitive prices after you have selected your flooring and added to the basket.
