UK **FLOORING** DIRECT

Find your floor

Hello.

Welcome to UK Flooring Direct

What better way to start a brand new look for your home than a floor from UK Flooring Direct. Our guide is full of practical tips and advice to help you choose a beautiful floor that fits your lifestyle.

From practical considerations of solid wood, through to how to make the most of natural light, we want to make it easy to help you find the perfect floor.

With over 300 products to choose from, we understand you might still have questions about what's the right floor for you. We'd love to help, so give us a call or go online at ukflooringdirect.co.uk

91 new products across engineered, solid wood and luxury click vinyl featured in this edition.

Flooring made easy

When it comes to a new floor there's plenty to consider, so let us show you the way to making the right choice for your home.

We understand that purchasing a new floor is a big decision, not only in terms of the type of product you need, but also how to get the look just right.

From the difference between a laminate or engineered wood and what's best for your home, through to making sure the plank size is right for the size of your room, to getting the perfect colour for your scheme; we're here to help.

Together, we make flooring easy and ensure your new purchase is perfect for your home.

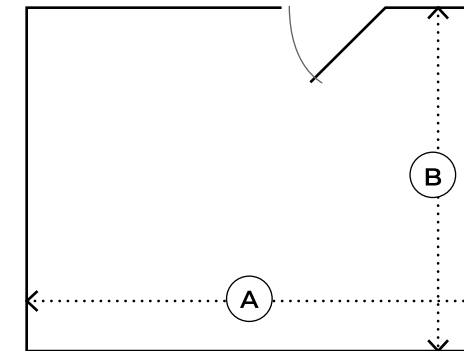

Measuring your room

Once you've got your samples in hand, it's a good idea to measure your room, so you know just how much flooring you'll need.

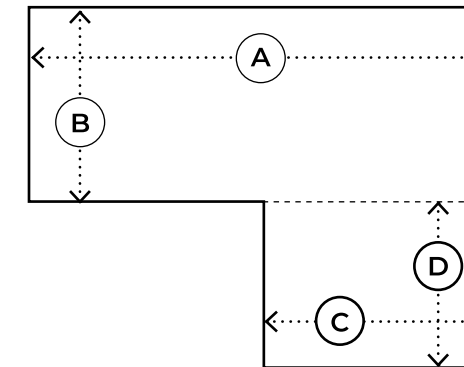

Rectangular rooms can be calculated easily by multiplying the length by width (example 1). If your room is L-shaped, has alcoves or bay windows, you need to divide your room into separate areas. Add these together to come to your final quantity (example 2).

Example 1

$A \times B$ = total quantity required
Eg: $4\text{m} \times 5\text{m} = 20\text{m}^2$

Example 2

$(A \times B) + (C \times D)$ = total quantity required
Eg: $(2\text{m} \times 8\text{m}) + (1.5\text{m} \times 2.5\text{m}) = 19.75\text{m}^2$

Click or stick?

At UK Flooring Direct, we've two main types of installation: traditional tongue and groove, which requires gluing or nailing, and click profiles that allow the floor to be clicked together for a much easier and faster installation.

You'll find our laminate, luxury click vinyl and engineered wood floors with click profiles, while solid wood - and selected engineered floors - come with a T&G joint. Our herringbone wood floors have a click system, they require gluing to the subfloor.

Tongue & groove

Using glue or nails, so best for professionals

Click

Fast and easy, making it ideal for DIY projects

Deciding on the right floor

Your samples will give you a great indication of the quality, texture and colour of your floor, but there are a few practical differences to also consider.

While your heart might yearn for a real wood floor, it may not be the most practical option. For those of us with busy family lives, or where a floor that's easy to live with is the important thing, it's certainly worth thinking about laminate or luxury click vinyl.

Laminate

- Pet & family friendly
- Easy to clean
- Easy to install

Engineered wood

- Real wood
- Unique planks
- Long lasting

Solid wood

- Real wood
- Unique planks
- Long lasting

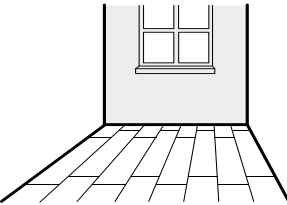

Luxury click vinyl

- Waterproof
- Easy to clean
- Easy to install

Getting the right size

The length and width of the plank has an impact on how your room will look.

Not only will the dimensions of the plank contribute to the mood of your room, but the

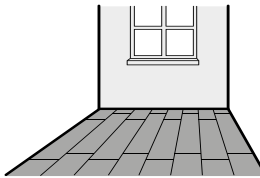

Choose wider and longer planks if you have a large room.

Making the most of light

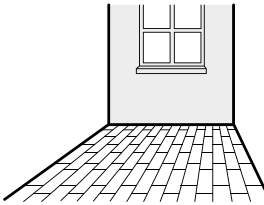

Not only will your interior decoration dictate whether you have a light or dark floor, so will the level of natural daylight and size of your room.

Remember that a dark floor may look great next to vibrant fabrics and strong wall colours, but it will also make a space feel smaller, so dark shades are best avoided in small rooms.

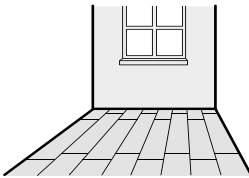

A dark floor will make any room feel smaller, so it is a look best used in larger rooms.

length and width will also affect the sense of space. Narrow and short planks will make small rooms appear bigger, while wide and long planks are best suited for larger rooms, as they will appear less fussy over a bigger area.

Choose narrower and shorter planks if you have a small room.

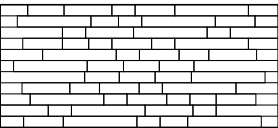

Light floors help to create a sense of space. In rooms with small windows, or low levels of daylight, lighter coloured floors should really be chosen to make the room feel brighter.

A light floor will make small rooms feel more spacious and can help to brighten spaces.

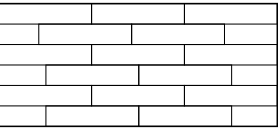

Plank width explained

We make it easy to pick your ideal width. All of our floors are either narrow, classic, wide or extra-wide.

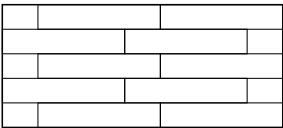

Narrow
(0-114mm)

Best for small rooms such as spare bedrooms and hallways.

Classic
(115-160mm)

A great choice for most rooms in average size homes.

Wide & extra-wide
(161-200mm & 201mm+)

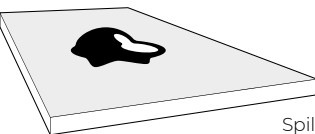

Best used for big rooms in large family homes.

Choosing the right finish

While our laminate and luxury click vinyl floors feature an easy care surface, the real wood finishes on our engineered and solid wood floors can alter the look and care of the floor.

Oiled finishes

Oiled floors have a natural appearance that develops a beautiful character over time. With proper care, UV surfaces can keep their natural looks for years.

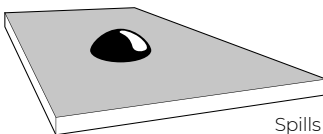

Spills 'seep' through on oiled floors making them more susceptible to staining.

Oiled finishes provide a degree of protection, though spills need to be quickly removed with a suitable cleaner - **see page 95**.

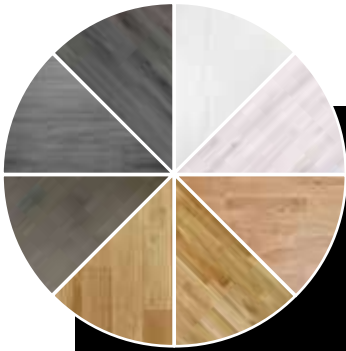

Lacquered finishes

Forming a barrier to scratches and spills, lacquered floors have a slight-sheen to the surface. This barrier means they require less attention than oiled floors.

Spills 'sit' on the surface of the lacquer coat, making them easier to remove.

A lacquered finish forms a coat on the surface, protecting it from wear and making it easier to clean up spills.

Colour explained

The tone of your floor will define the mood of your room.

Light tones give a light and minimalist look, while also helping your room to feel lighter and bigger, making them a great choice for smaller rooms or those with little natural light. Dark tones add a sense of drama and character to the home, while neutral tones, somewhere in the middle of light and dark are true all-rounders.

Moroccan mood

With Pinterest awash with mosaic tiles, black and white Berber rugs and colourful leather pouffes, no one can have failed to notice the influence that Moroccan style is having on today's interiors. Part of a wider movement away from mass-produced goods in favour of ethnic-inspired, authentic pieces, the Moroccan aesthetic ticks all the boxes when it comes to current interiors trends, embracing geometric patterns, natural textures and an emphasis on the handcrafted and artisanal.

A blend of African, Arab and European influences, Moroccan style is wonderfully versatile. Its trademark palette of Mediterranean blue, spicy reds and gold is perfect for injecting life and energy into any space, but an all-white Moroccan scheme, incorporating gauzy fabrics and touches of silver or pewter, can be elegant and calming. Be aware, though, that some elements of Moroccan style simply don't travel well. Moroccan tiled flooring, for instance, will give you a classic riad look, but a better fit for our chilly UK climate – and an equally authentic choice – is real wood, preferably in a rustic grade that highlights each plank's inherent tonal markings, knots and streaks.

Our Home Choice Engineered European Rustic Oak Flooring 14mm x 130mm Brown Sugar Lacquered has just the right look: a richly detailed grain that shows off the beauty of the wood in all its glory, a welcoming mid-brown hue that tones beautifully with signature Moroccan shades (as well as lush foliage in terracotta planters) and a vintage vibe that will make it seem as if it's been part of your home forever. White wood, like our Galleria Professional Engineered European Rustic Oak Flooring 15mm x 190mm Winter Dawn Lacquered, is another great option, and makes a beautiful backdrop for brightly coloured kelims. You'll find a host of similar looks in our Laminate and Vinyl collections, so whatever your practical concerns and budget we're confident we have just what you need to bring a little Moroccan magic to your home.

Shop by colour

With floors in shades ranging from almost-white to midnight black, there's a perfect match for your interior. Use our shop by colour guide to find your perfect shade.

Spa-style bathrooms

Lifestyle trends have a way of influencing our decorating choices, and the current vogue for spa-style bathrooms is the perfect example. More and more of us are turning our bathrooms from purely functional spaces into oases of calm as we seek to unwind, de-stress and boost our wellbeing. Whether we try to recreate the look and ambience of our favourite wellness retreat, boutique hotel or tropical holiday resort, it's all about escapism and luxury; think premium materials like marble and terrazzo, metallic details such as gold taps and light fixtures, and high-tech extras such as wired-in music systems.

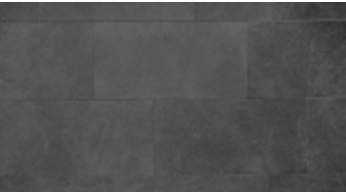

The great news is that in most cases, achieving a spa-style look in the bathroom doesn't require a major overhaul or hefty expenditure. It's easy to add glamour by introducing a few luxe touches such as mirrors, candles and good-quality towels,

and replacing tired-looking flooring with a stylish and modern alternative, like our fabulous Luxury Click Vinyl. Offering fabulous value for money, our click-fit vinyl is the ideal choice for bathrooms and wet rooms, being 100 per cent waterproof.

With over 70 designs on offer, whatever the look you're after, you'll find a floor to match. Dark and dramatic? Check out Spectra Midnight Sky Stone Tile Luxury Click Vinyl Flooring, which features a dusting of silver sparkles against a matt black background, creating a subtle shimmer that takes dark flooring to another level. Want something classic and sophisticated? Then Spectra Pearl Grey Oak Plank Luxury Click Vinyl Flooring, with its elegant wood look, could be for you. Our Aqualock and Audacity ranges of highly water-resistant laminates are also a great fit for bathrooms, and offer a fantastic range of realistic wood looks.

Engineered

Engineered and solid wood floors are divided into grades based on how many surface markings they display. The features considered when grading wood include: the number and size of knots; the amount of sap present in the wood and its colour variation. The smaller the knots, the lower the sap content and the more uniform the colour, the higher the grade of wood.

Select grades are the highest grade of flooring.

They feature a grain where there is little variation in appearance, with no sapwood for less pronounced colour variation and only a few pinhole knots for a floor that has a clean look. This grade of flooring is the most expensive as it is in limited supply from the raw material.

Nature grades are the classic grade of timber.

They feature a grain with natural variation, limited

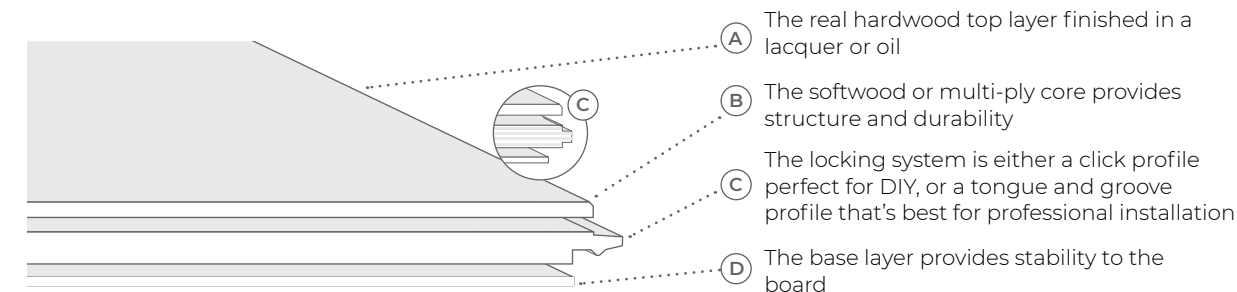

mineral streaks, occasional sapwood and occasional small and medium sized knots for a floor perfect for those seeking a classic look.

Rustic grades are vibrant and colourful floor full of character and excitement.

They feature a lively grain with swirling pattern, colour variation, small mineral streaks, sapwood and knots of all sizes for a floor that has a rustic look.

Character grades offer the most variation and charm.

They feature a grain alive with a large amount of colour variation and featuring mineral streaks, river cracks, sapwood and unlimited knots of all sizes, with filler, for a floor with character.

Features & benefits

- All the luxury and beauty of solid wood
- Unique – being made from natural wood, every plank has a unique character
- Enhanced Stability – being made of individual layers it's less prone to shrinking and warping than solid wood flooring
- Durable - multi-ply core floors give you the ultimate stability and strength, while softwood or HDF cores give less stability and strength but at a great price point
- Compatible with Under Floor Heating – floor surface temperature must not exceed 27 degrees C
- Long lasting - the surface can be sanded and re-finished multiple times
- DIY Friendly – click system available for quick and easy fitting. Also available in tongue and groove for professional fitting

delivery

No hidden costs,
delivery from £30

Unlike our competitors, we don't spread the cost of delivery across our products. We only charge you one fee no matter how many items are in your order.

We offer several delivery options to meet your needs; from In Home Delivery to Free Click and Collect. Please read the details when purchasing to ensure you have the correct delivery method which suits you.

Next day and in home delivery available

Solid wood

Cleaning & Maintenance

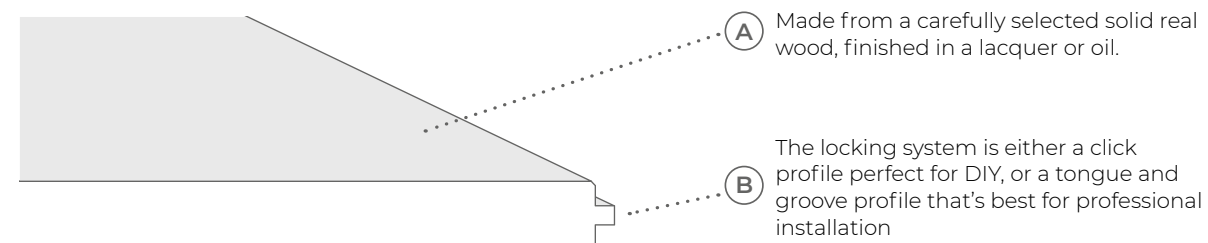

Solid wood floors need more care and attention than laminate, but the results are well worth it, as a floor that is properly looked after will stay in great condition for many years and develop greater character as it ages.

For daily cleaning, vacuuming or regular sweeping with a soft-bristled broom will help keep a hardwood floor free of dirt that can scratch or dull floors if allowed to build up.

It is also good to keep wet mopping to a minimum, but if necessary it's best to use our Unika Laminate and Wood Floor mop. In addition,

rather than water we recommend that you use our Unika Laminate and Wood Daily Cleaner for lacquered floors, which leaves a protective film and enhances the grain and for oiled floors, we recommend that you use our Woca Soap Spray, which has nourishing properties that protect against dirt and liquids.

For best results we offer Woca Care and Protect kits (available for Oiled floors and for Lacquered floors). These kits contain everything you need to clean and protect your floor including an everyday cleaning soap, an intensive cleaner, cloth and applicator pad. This is a must have for anyone wanting to keep their floor looking like new.

Features & benefits

- The unmistakable elegance of solid wood
- Truly unique - made from a single piece of carefully selected timber, every plank is different
- Characterful – will age gracefully, developing more character year after year
- Long Lasting - the surface can be sanded and re-finished multiple times
- DIY Friendly – click system available for quick and easy fitting. Also available in tongue and groove for professional fitting
- Strong - load bearing floors available

Laminate

Expert tips & advice

What is AC rating?

AC Rating, used for laminate and vinyl floors, is a measure of a floor's resistance to abrasion, impact, stains and cigarette burns. The ratings also indicate that the product has been tested for the effects of furniture legs, castors, and swelling along its edges. At UK Flooring Direct we only supply AC3 rated and above flooring, so every laminate is durable enough to cope with a typical household routine.

AC 3 Heavy Domestic

Suitable for use in all areas of the home even hallways, living rooms and kitchens.

AC 4 General Commercial

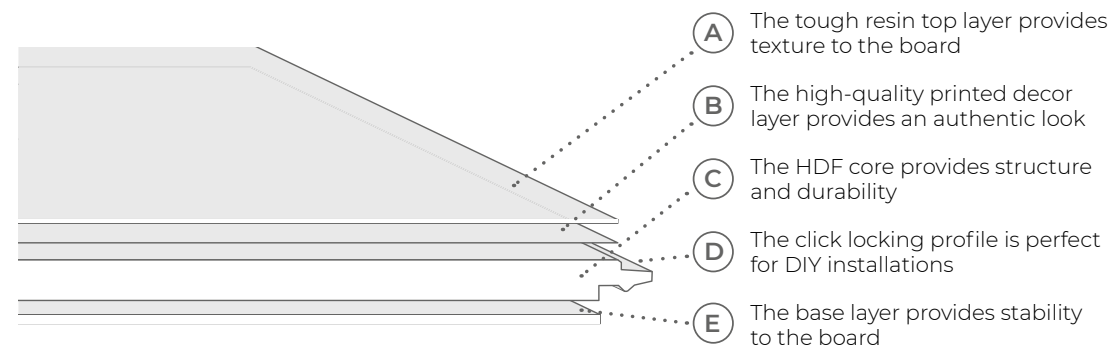

Suitable for all areas of the home and commercial uses such as offices, waiting areas and stores.

AC 5 Heavy Commercial

Suitable for all areas of the home and in heavy commercial locations such as department stores, public buildings and showrooms.

AC 6 Ultra Heavy Commercial

Suitable for use in all areas of the home and very heavy commercial high footfall traffic areas such as shopping malls, classrooms and public hallways.

Features & benefits

- Cost effective alternative to real wood
- Features a textured surface that looks and feels like real wood
- Widest range of colours – find the perfect match for your interior
- Hard wearing – suitable for even the busiest of environments
- Water Resistant products are even suitable for the bathroom
- DIY friendly – click systems make it quick and easy – no glue required
- Under Floor Heating compatible
- Easy to maintain – no complex regimes, simply give a light mop
- Hygienic – no carpet fibres mean no trapped dust and dust mites

Luxury Click Vinyl

Why choose luxury click vinyl?
 Luxury click vinyl floors use modern technology, meaning that even though the planks or tiles are only 4mm-5mm thick they are extremely durable. The flexible nature of the product means, that when combined with our premium vinyl underlay, minor subfloor imperfections are diminished.

All our luxury click vinyl planks and tiles come with click system installation, and there is no mess created when installing as cutting the flooring just requires a knife, this makes them one of our easiest

products to install and perfect for a DIY project. No saws and no sawdust.

Pet-friendly, easy to clean and highly resistant to spills and stains, luxury click vinyl is great for busy families that want a worry-free floor. Available in many styles in plank and tile formats, and with different thicknesses depending on your needs, luxury click vinyl delivers the sought-after natural look with all the practicalities and advantages of modern flooring.

Features & benefits

- All the look of wood and stone but ultra-durable
- 100% waterproof perfect for bathrooms and kitchens
- Extremely hard wearing impact and scratch resistant – great for high use areas
- Wide range of finishes find the perfect match for your interior
- Natural to the touch - realistic finish gives subtle textures of wood or stone grain
- Easy maintenance just mop or brush weekly
- DIY friendly easy to install click system – no glue required
- Minimal installation mess - no saws, no saw dust, just a sharp knife required
- Hygienic - doesn't trap allergens or dust mites, making for easy removal
- Environmentally friendly - constructed with up to 50% recycled materials

Accessories

Step 1

Prepare your subfloor for installing your click or T&G floor.

Step 2

Install your click or T&G floor using our recommended underlays and adhesives.

Step 3

Finish your laminate, luxury click vinyl or wood floor with our matching profiles and trims.

Step 4

Look after your laminate, luxury click vinyl or wood floor with our specialist refreshers and cleaners.

Prepare the easy way

Step 1

When it comes to preparing to fit your new floor, we've got everything you need for a professional end result. Whether you choose the speed and ease of a click profile or a traditional tongue and groove solid wood floor; our installation kits, damp proof membranes and primers will get the job done.

ACC-IN-KT-001

Easy Fit Flooring Installation Kit

This useful kit includes the spacers, pull bar and tapping kit essential for any laminate, engineered or solid wood floor.

ACC-IN-RO-003

Luxury Click Vinyl Hand Roller

Helping to guarantee a reliable click on each edge, this handy tool is necessary for the correct installation of click LVT.

ACC-IN-KT-001

Easy Fit Flooring Installation Kit

This useful kit includes the spacers, pull bar and tapping kit essential for any laminate, engineered or solid wood floor.

ACC-LJACKPRIME5

Lumberjack M.B Primer 5Ltr

A 2-in-1 primer that stabilises dusty concrete subfloors and acts as a moisture barrier. Designed to work with Lumberjack flooring adhesives.

Click floors

If you're fitting laminate, engineered or luxury click vinyl floors with a click profile, you'll need these installation and finishing accessories

Tongue & groove floors

If you're installing solid wood floors with a traditional tongue & groove joint, you'll need these installation and finishing accessories.

Install the easy way

When it comes to installing your new floor, we've got everything you need for a professional end result. Whether you choose the speed and ease of a click profile or a traditional tongue and groove solid wood floor; our underlays and adhesives will get the job done.

Click floors

Best for reducing noise with luxury click vinyl flooring

ACC-UN-LC-02

Acoustic Luxury Vinyl Underlay

This thin but highly efficient product not only speeds up installation due to it's non-slip surface but also reduces the noise of footfall by up to 21dB.

Best budget choice for wooden subfloors

We care

About environmental responsibility.

As members of the British Wood Flooring Association (BWFA), and The Contract Flooring Association (CFA), we make sure that all of our suppliers meet the convention on international trade on endangered species, this ensures that there is no illegal logging, significant conversion of natural forest to plantations and that workers are treated fairly.

Discover these features on selected floors

Use this overview to understand the features and benefits of our laminate, engineered, solid wood and luxury click vinyl floors.

Profile	Species	
<div><div>CH</div><div>Character</div></div> <div>A grain alive with a large amount of colour variation and featuring mineral streaks, river cracks, sapwood and unlimited knots of all sizes with filler for a floor that creates a character look.</div>	<div><div>A</div><div>Ash</div></div> <div>Similar in appearance to oak, this wood is slightly lighter and is marginally harder than oak.</div>	
<div><div>5G</div><div>5G Click System</div></div> <div>An advanced click relying on a locking profile for fast and simple DIY installation.</div>	<div><div>S</div><div>Select</div></div> <div>A grain where there is little variation in appearance, with no sapwood for less pronounced colour variation and only a few pinhole knots for a floor that has a clean, contemporary look.</div>	<div><div>Finish</div></div>
<div><div>5GCC</div><div>5GCC Click System</div></div> <div>An advanced 5G click relying on a locking profile for fast and simple DIY installation.</div>	<div><div>N</div><div>Nature</div></div> <div>A grain with natural variation, limited mineral streaks, occasional sapwood and occasional small and medium sized knots for a floor perfect for those seeking a classic look.</div>	<div><div>B&U</div><div>Brushed & UV Oiled</div></div> <div>The surface of the wood is brushed and textured to touch, enhancing grain markings with a UV oil to let the wood look its most natural.</div>
<div><div>5GS</div><div>5GS Click System</div></div> <div>The latest evolution in click system technology, as well as a locking profile on the long edge, 5G Click uses a plastic widget on the short edge to provide a robust joint on all sides that can be simply pushed down into place with ease.</div>	<div><div>R</div><div>Rustic</div></div> <div>A lively grain with swirling grain and a depth of colour variation and featuring small mineral streaks, sapwood and knots of all sizes with filler for a floor that has a rustic look.</div>	<div><div>B&O</div><div>Brushed & Oiled</div></div> <div>The surface of the wood is brushed and textured to touch, enhancing the grain markings and finished with a natural oil to look its most natural.</div>
<div><div>T+G</div><div>Tongue & Groove</div></div> <div>A traditional fixing method that uses gluing or nailing to ensure a secure joint and therefore recommended for professional installation.</div>		<div><div>UV</div><div>UV Oiled</div></div> <div>UV Oil has a natural appearance with minimal sheen, ideal for a classic look in the home.</div>
		<div><div>O</div><div>Oiled</div></div> <div>Natural oil has a natural appearance with minimal sheen, ideal for a classic look in the home.</div>

Enjoy these benefits on selected floors

<div><div>Pet-friendly</div></div> <div>When you see this icon, you can be confident that the floor will stand up to the paws, spills and accidents of pets.</div>	<div><div>Authentic surface</div></div> <div>These laminate and luxury click vinyl floors have a textured surface layer that replicates wood grain or stone for more realism.</div>	<div><div>Commercial use</div></div> <div>With super-strong constructions and hard-wearing wear layers, these floors are suitable for use in shops, offices and hotels.</div>
<div><div>Waterproof</div></div> <div>Waterproof floors are best for bathrooms and kitchens, bringing lasting protection from water and spills.</div>	<div><div>Bathroom-ready</div></div> <div>With water-resistant and slip-resistant surfaces, These floors are ready to take on the demands of bathroom use.</div>	<div><div>Warranty</div></div> <div>Guaranteed for quality under normal domestic use in accordance with the manufacturer's terms and conditions.</div>
<div><div>Water-resistant</div></div> <div>Ideal for bathrooms and kitchens, water-resistant floors are safe from spills and water up to the number of hours indicated.</div>	<div><div>DIY-ready</div></div> <div>With click-system profiles and a stable construction resistant to shrinkage and expansion, these floors are easy to fit.</div>	
<div><div>Easy-clean</div></div> <div>These floors have a surface that's perfect for busy family life.
